

# COMMERCIAL GYM FIT OUT CLEAN

  
Simplicity  
Services  
LONDON

# SALUS

# PROJECT OVERVIEW:

Simplicity Services were appointed to carry out a comprehensive post construction clean for a newly fitted commercial gym facility.

The space included strength and conditioning zones, cardio areas, studios, changing rooms and circulation spaces.

# THE BRIEF

The site required a detailed clean following extensive installation works, with a focus on preparing the facility for opening.

This included removing construction dust, debris and residue while ensuring all surfaces, equipment and finishes were presented to a high standard.

# OUR APPROACH

Our team delivered a full deep clean across the entire facility, working methodically through each zone to ensure consistency and attention to detail.

High traffic flooring, specialist gym equipment, glazed partitions and washroom areas were all thoroughly cleaned and checked.

We paid particular attention to ventilation areas, exposed ceilings and fixtures, ensuring the finished space felt fresh, safe and ready for use.

# THE RESULT:

A clean, professional and welcoming environment ready for staff and members.

The final result supported a smooth handover and opening of the facility, with the space presented exactly as intended following the fit out.
